Leather shavings

VITANOVA

Unique Pasubio's product

The Recycled Leather is an ecological opportunity that will allow to use 100% of scraps achieving Zero Waste goal. It is obtained from shaving (Wet-Blue or Wet-White) and cutting scraps collected from Pasubio plants.

The product (60% leather fibers + 40% other chemicals) is being developed together with Salamander, German partner and leader in the leather fiber processing.

VITANOVA's flow in the production process of standard leather
